

STATA[®]

Installation-Guide Stata 19

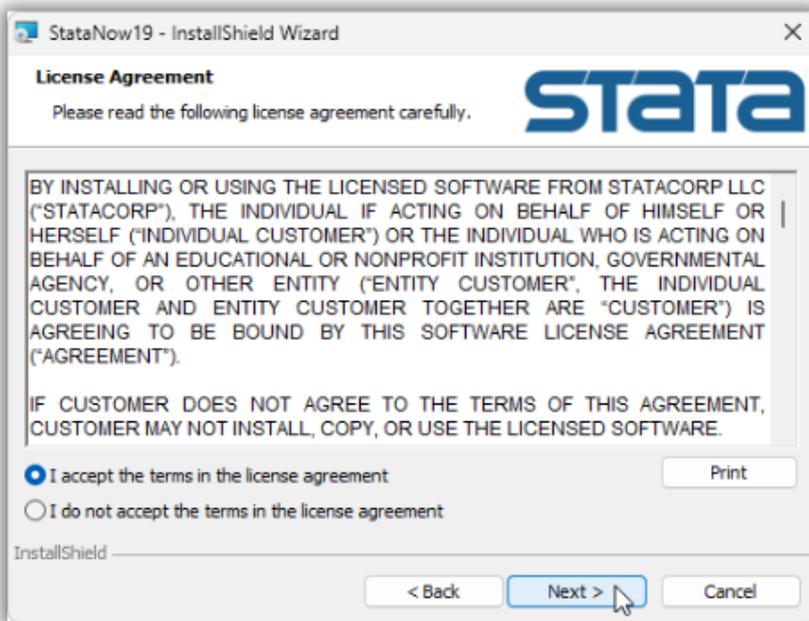

Running the installation

1. Close other programs, and click on **“Next”** to start the setup.

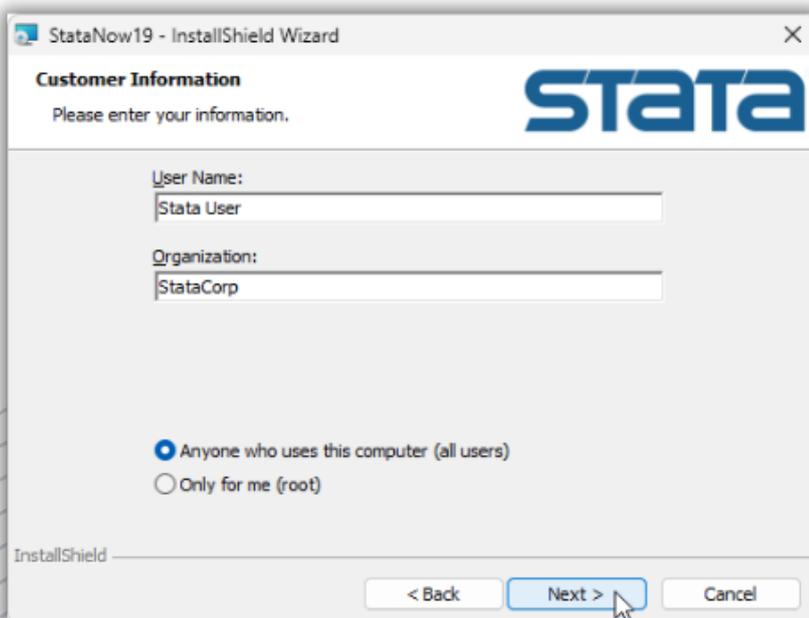

2. Read the License Agreement. You will have the option to print the instructions if you wish to do so. Click on **“Next”** to continue.

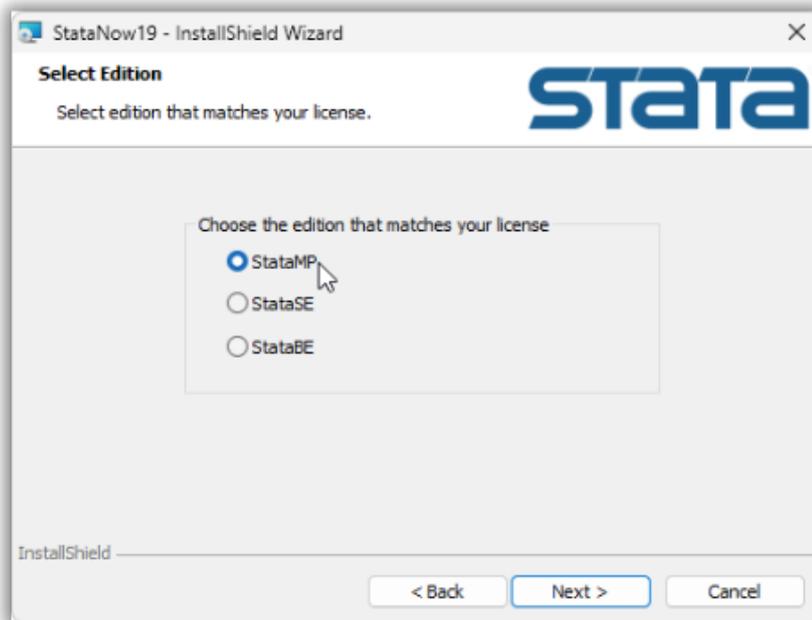

3. Enter your name and your company or organization, and choose whether you wish to allow anyone who uses your computer to access Stata or only you. Click on **“Next”** to continue.

4. Select the type and edition of Stata to install next, and click “Next” to continue.

Attention !

If you try to install a edition of Stata different from the one you purchased, you will receive an error later on, and Stata will not work on your computer. Then you will have to uninstall and reinstall Stata with the correct settings to resolve the issue.

Please check your license carefully before proceeding. Select the executable that matches your license.

License and Activation Key Stata Software

This License and Activation Key is an *important* document. Three pieces of information on this document — the serial number, code, and authorization — will be required during the installation process of the software you have licensed from StataCorp LLC (“StataCorp”), as further described below.

This document is valuable proof of purchase for your software license. You should store this document in a safe place for record keeping.

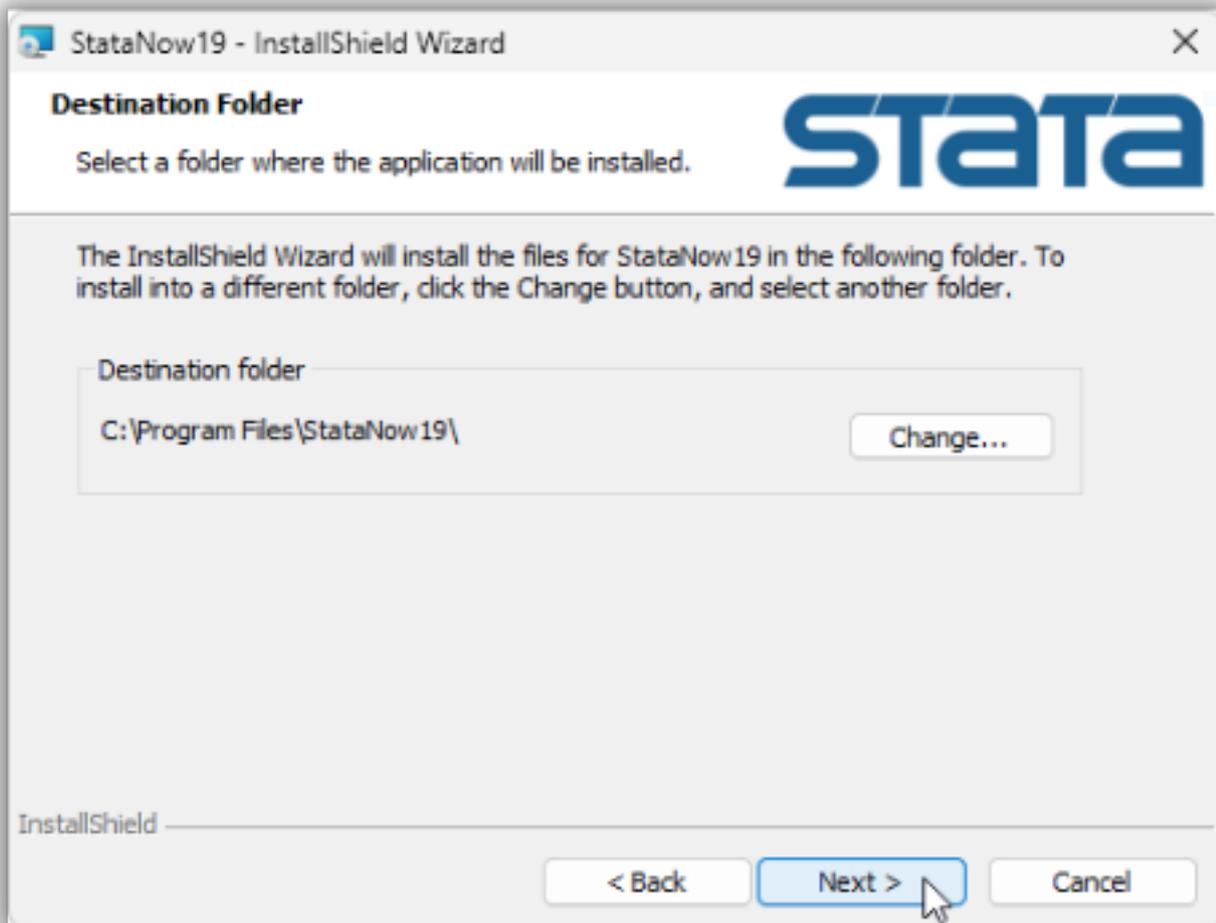

Licensed software:	StataNow/MP 19.5 (4 cores)	← Make sure you install the same edition of Stata that is shown on your license!
License type:	Single-user	
License term:	Expires 07/17/2027	
Serial number:	[REDACTED]	
Code:	[REDACTED]	
Authorization:	[REDACTED]	

5. Select a **Destination Folder**. Stata will choose one automatically. If it does not exist, Stata will create it. If you wish to have Stata installed somewhere else, click on “Browse” to navigate to that location.

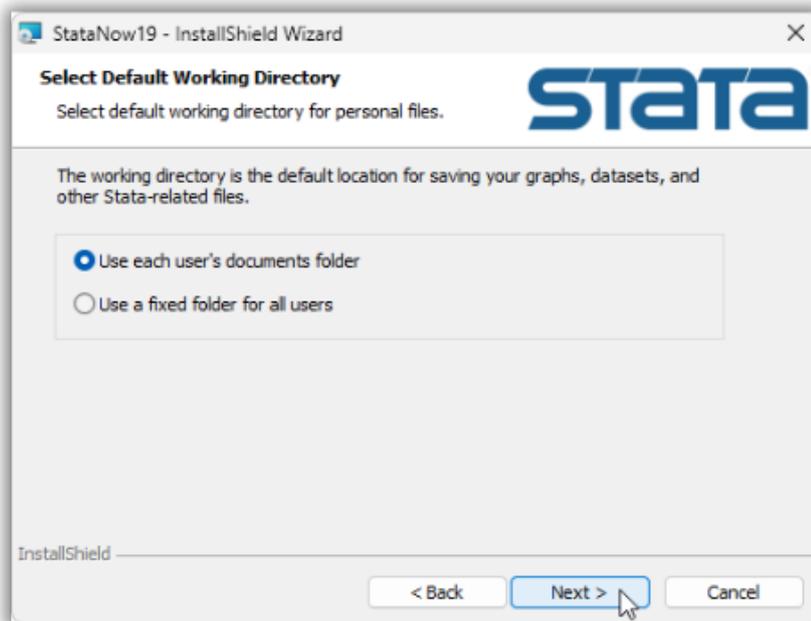

We recommend that you choose the **default directory**.

If you want to install Stata on a network drive, you will need a network license. You can install Stata from the server, or if you have the appropriate privileges, you can install Stata directly to the network drive. Click on “**Next**” to continue.

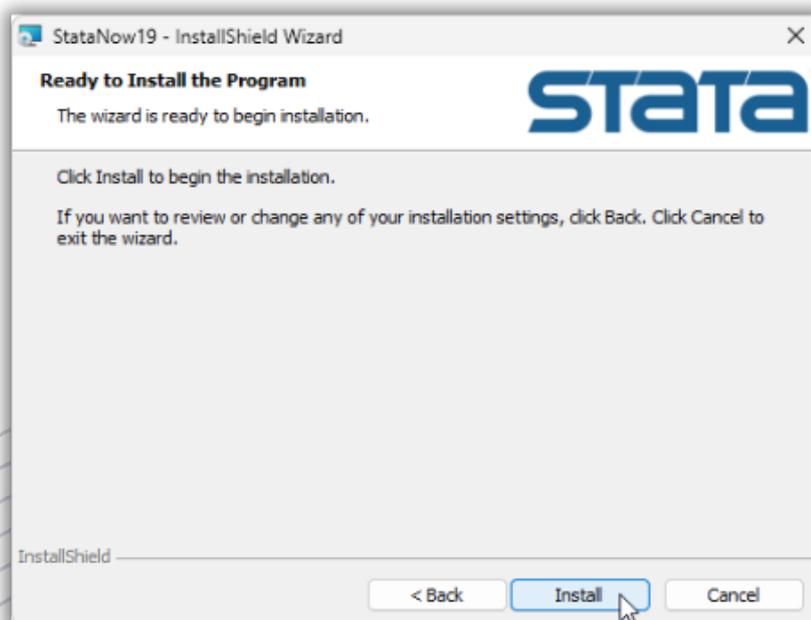

6. Choose the default location for saving Stata files. You can use each user's **Documents** folder, or use a fixed folder for all users. We strongly recommend that you use each user's Documents folder. Then click on **"Next"**.

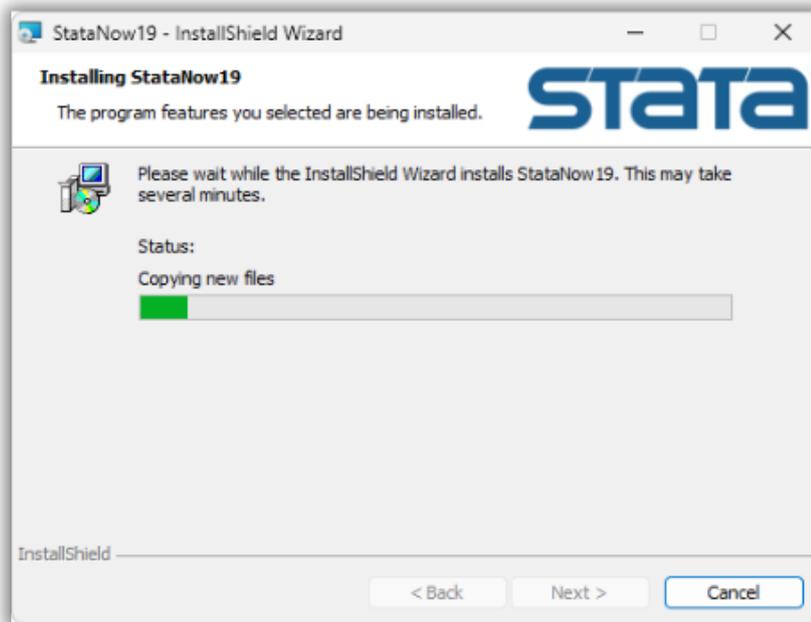

7. You are ready to install the application! Click on Back if you have any corrections to make. Click on **"Install"** to proceed.

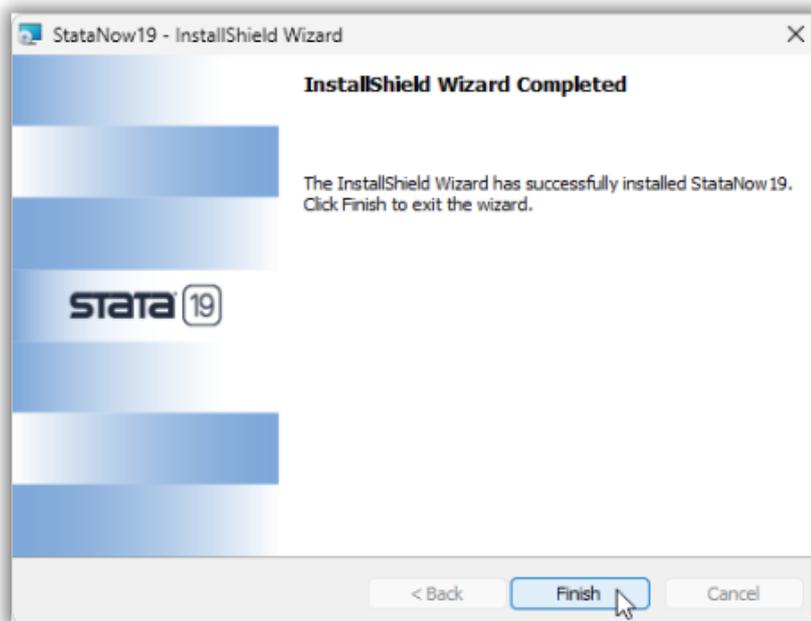

STATA[®]

8. After clicking on “**Install**”, you will see the progress bar as Stata completes the installation. This may take a few minutes.

9. When Stata has finished installing, click on “**Finish**” to exit the installer.

10. If you would like to modify your installation or install other editions of Stata, you can run the installer again. It will bring up the Application Maintenance dialog. Check **Modify** and click on “**Next**”. You can then choose the edition or editions of Stata that you would like to add.
